

## AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph beginning on page 14, line 1, as follows:

Preferred polymers of the invention comprise those of Formula 1A:

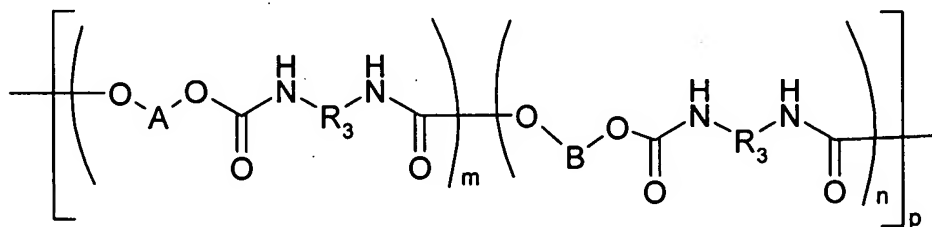

where:

R<sub>1</sub> is hydrogen or methyl;

R<sub>2</sub> is a divalent residue derived from alkyl or alkoxy hydroxy (meth) acrylate(s); more preferably an alkyl or alkoxy residue;

R<sub>3</sub> is a divalent residue derived from aliphatic, cycloaliphatic, heterocyclic and/or aromatic diisocyanate(s);

R<sub>4</sub> is a divalent random block copolymer backbone of Formula 2A:

Formula 2A

where:

A is a divalent residue derived from one or more acrylic-derived polyol(s);

B is a divalent residue derived from one or more rubber-derived polyol(s);

m and n are independently an integer from 1 to 20; and

p is from about 2 to about 50.
